August 11-13, 2020

Learn effective and engaging ways to teach solar principles in your middle or high school classroom!

Join us at Shoreline Community College for three days of hands-on solar energy lab activities that you can bring to life in your classroom. You will learn how to successfully install and commission a residential-size solar photovoltaic array.

- FREE interactive, high-engagement instruction in cutting-edge technology
- $300 stipend paid upon completion of the Solar Institute
- Lesson plans, videos, and teaching resources included
- STEM Integration clock hours available
- Breakfast and lunch provided each day

Space is limited to 20 middle school or high school instructors in science, technology, engineering, math, or career/technical training fields. Applications received after May 5, 2020 considered on a space available basis.

“The Solar Institute is great because it’s taught me concepts I can easily bring back into the classroom and use to engage and foster my students’ interest in green energy.” – Craig Patterson, teacher

Apply by May 5 for priority consideration!
